

## 4K HDMI® to 12G SDI Converter

- Supports 12G / 6G / 3G / 1.5G / SD-SDI Signals
- 3G SDI Level A and Level B support
- 2x BNC and 1x optional Fiber SFP outputs
- 1x HDMI 2.0b input
- HDMI Embedded PCM Audio Passes Transparently
- HDMI present LED indication
- LynxCentraal and yelloGUI compatible for internal settings

The CHD 1402 is a compact HDMI to SDI converter. It is an ideal solution for any application which requires a broadcast quality SDI signal derived from an external HDMI source. Currently, PCM and AC3 audio present in HDMI stream are transparently passed through / embedded into the SDI output.

The module is also compatible with the yelloGUI and LynxCentraal control software, which provides access to additional internal settings.

An SDI fiber output is also provided with a selection of optional SFPs.

**Note:** For legal reasons, HDMI capture devices from LYNX Technik AG are designed not to capture, convert or transmit video or audio from HDCP copy-protected sources (e.g. Satellite receivers, Cable receivers, etc.).

## Video Output Resolution

The module does not have an internal scaler. If the input resolution does not match any of the supported SDI formats, the module by default will select an appropriate SDI standard with a similar number of line pixels and map the signal into the SDI output. This may result in some image cropping (cut) or boxing (blanking) of the overshot area. To change the output format, please connect the module to a PC or Mac via either yelloGUI or LynxCentraal.

## Application Example

An example application is shown below, using the CHD 1402 to convert the HDMI output from a video camera into SDI, and transmit the SDI over fiber to a remote location. A CDH 1411 SDI to HDMI converter is used to provide the SDI output and an HDMI monitoring output in the remote location with audio, metadata and timecode overlay.

Fiber Connection up to 40km (24.9 miles) @ 12Gbit/s with select SFP modules
