

Power supply holder for RFR 1200

- Compact design
- Accommodates 1 power supply for RFR 1000-1
- Innovative locking system to secure power supply
- Easy installation
- Compatible with RPS A100, RPS 1120 and RPS 6120 power supplies

External power supplies have been a struggle for everyone seeking a clean organized installation and setup. RXT 1001, a power supply holder for RFR 1000-1 yellobrik rack frame, can simplify cable management by securing the external power supply and making the installation neat.

RXT 1001 can secure one RPS A100 (RPS 1120/RPS 6120) power supply. A maximum of two RXT 1001 can be mounted on the RFR 1000-1 which will allow securing the main and the redundant power supply of RFR 1200.

RXT 1001 has an innovative locking mechanism that firmly secures the power supply and avoids its movement during the transportation of equipment or during installation of other equipment.

Technical Specifications
