4K Fiber Transmission System

- Support for 4 independent 3G/HD/SD-SDI channels
- Transport 4K (uncompressed) up to 20km (12 miles)
- Each channel supports resolutions up to 1080p/60Hz
- Each channel individually reclocked
- Embedded audio / metadata support for each channel
- Integrated expansion port to add more channels
- LED indicators for channel activity and power
- Kit includes transmitter, receiver and power supplies
- Optional 19" Rack tray to mount (max) 4 modules

The OTR 1442 is a self contained fiber transmission kit for the transport of 4 discreet SDI signals (or 4K / 12G uncompressed) over a single fiber link. The kit includes the fiber transmitter, fiber receiver and power supplies. This is an ideal solution for the transmission of multiple uncompressed SDI streams, or 4K up to 20km with zero losses.

Each SDI channel is fully independent. For 4K use the signal is split over 4 separate 3G SDI links (12G) and supports full 4K resolution at 60fps. The system can also be used for any combination of SDI signals, with a mix of formats and bit-rates if required. Each channel will automatically detect and reclock SDI bit rates of 270Mbit, 1.48Gbit and 2.97Gbit.

An expansion port is included for the connection of the OTR 1441 to add 4 more SDI channels (for dual 4K transport), or add bidirectional Ethernet or Serial RS 232 into the link.

LEED Indicators are provided for channel presence and power. An optional 19" rack mount tray is available which can accommodate up to 4 modules (RFR 1018).

**Technical Specifications**

**SDI I/O**
- 4 x multi-format 3G/HD/SD-SDI inputs (OTX 1442)
- 4 x multi-format 3G/HD/SD-SDI outputs (ORX 1442)
- 75 Ω BNC connections
- SMPTE 424M-2006, DVB ASI
- Multi-standard / Multi-format operation auto-detect.
- Multi-rate reclocking: 270Mbit / 1.48Gbit / 2.97Gbit
- Return Loss: > 15dB to 1.5Gbit and > 10dB to 2.97Gbit
- Automatic Cable EQ (Belden 1694A cable)
- 340m@270Mbit, 150m@1.48Gbit, 120m@2.97Gbit

**Fiber I/O**
- 1 x Fiber optic I/O port (COM port)
- 1 x Fiber optic expansion port (UPG port)
- LC/PC connections - Single Mode
- SMPTE 297M - 2006
- Internal CWDM Multiplexing
- Wavelengths: 1350nm, 1370nm, 1390nm, 1410nm
- Optical budget: 10.6dB
- Maximum distance (typical): 20km (12 miles)
- Fiber activity LEDs for each channel

**Power**
- +12VDC nominal. ORX 1442 = 4.4W, OTX 1442 = 5.4W
- Supports external power input from 9 - 17 VDC
- 2 x Power LEDs provided

**Physical**
- 170 x 99.7 x 40.5mm (6.7" x 3.9" x 1.6"
- Weight: 600g (21.1oz) net - (each module)

**Ambient**
- 5 - 40°C (41 - 104°F) 90% Humidity (non condensing)

**Model #**
- OTR 1442 LC - (EAN# 4250479324374)

**Includes**
- OTR 1442 - 4K Fiber Transmitter module
- ORX 1442 - 4K Fiber Receiver module
- 2 x 12VDC [brick] power supplies

**Note.** Internal CWDM optical multiplexing is utilized within the modules. This kit should be considered a self contained point to point solution and should not be integrated into external CWDM systems. An expansion port is included on each module which can be used to add additional SDI channels from the OTR 1441, or a bidirectional Ethernet or Serial RS232 signal.

Specifications subject to change.
Applications

4 x SDI (4K 12G) Fiber Transport
This basic configuration is used for transporting up to 4 discreet SDI signals (SD/HD/3G) or it can be used for transporting a 4K (12G) signal over fiber.

4 x SDI (4K 12G) Fiber Transport + Ethernet
This configuration transports 4 discreet SDI signals (SD/HD/3G) or 4K (12G) and also adds bidirectional Ethernet from the OBD 1510 E into the same fiber link using the UPG expansion port. Note: Total distance is reduced to 5km when used in this configuration.

4 x SDI (4K 12G) Fiber Transport + Serial RS 232 + GPI
This configuration transports 4 discreet SDI signals (SD/HD/3G) or 4K (12G) and also adds bidirectional Serial data (RS232/422/485) + GPI from the OBD 1510 D into the same fiber link using the UPG expansion port. Note: Total distance is reduced to 5km when used in this configuration.

4 x SDI (4K 12G) Fiber Transport + Ethernet
This configuration transports 4 discreet SDI signals (SD/HD/3G) or 4K (12G) and also adds bidirectional Serial data (RS232/422/485) + GPI from the OBD 1510 D into the same fiber link using the UPG expansion port. Note: Total distance is reduced to 5km when used in this configuration.

Dual 4K and 4K Bidirectional Fiber Transport Solutions
Connecting the OTR 1441 into the expansion port will add 4 more SDI channels to the system which will facilitate the transport of dual 4k (12G) unidirectional signals over a single fiber link, or 4K (12G) bidirectional fiber transport over a single fiber link.

Please refer to the product information for the OTR 1441 for diagrams of these configurations.
